

**PROTECT
YOURSELF
& OUR FORESTS
ALONG HIGHWAYS**

NOTICE OF HAZARDOUS TREE IDENTIFICATION:

Caltrans contractors are identifying and marking dead and dying hazardous trees that could impact the safety of the traveling public along the state highway. Some of these trees could fall toward the roadway from your property, blocking traffic or causing injury and damage.

After dead and dying trees are marked with orange paint, the next phase of the project will begin — tree cutting and removal. Marked trees along highways may be on federal, state, county or private property. Written permission must be provided by all affected property owners before Caltrans can perform it's work.

Keep an eye out in your mailbox for a "Permission to Enter" form, mailed within 1-6 months after trees are marked. The Permission to Enter form must be signed and returned, or submitted electronically, by the deadline on the form. There is no cost to you. However, if a private property owner does not respond, or denies permission, the hazardous tree will not be removed and the property owner is liable for future damage that may occur if the tree falls on the highway.
